

# FrontTrade

**Ultra-low latency order execution gateway  
facilitating market access to 40+ exchange venues**

## Fast Facts:

- Quick access to 40+ global derivatives exchanges
- Scale with ease into new markets/ exchanges
- Tested performance for ultra-low latency quality execution and high throughput
- Easily integrate with your existing trading screen and gain ultra-low latency direct access to global exchanges
- Pre-trade risk for full compliance with SEC Rule 15c3-5 and MiFID II

## Technical Features:

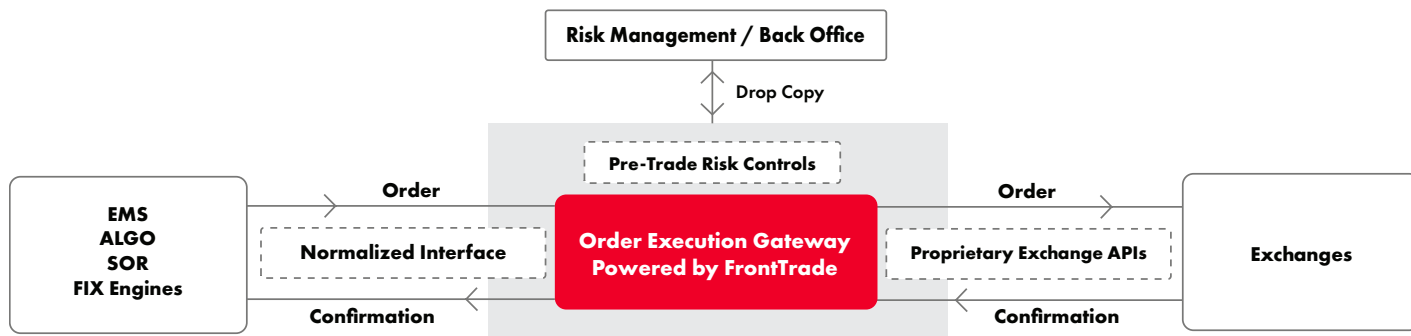

- Normalized interface via our proprietary API (FRAPI) or industry standard FIX
- FIX Drop Copy to facilitate integration with your back-office solutions
- APIs support C++, C# and Java and can run on Windows or Linux
- Run as a standalone application for multiple clients/ trading applications to connect
- Scalable system that enables multiple users or entire trading desks and enterprises

## Solution Overview

- » Exegy's FrontTrade is an order execution gateway that provides ultra-low latency order management in a reliable and scalable manner
- » Our solution can support all forms of electronic trading systems, from low touch APIs (black box) to high-touch screen-based trading.
- » Built for scale, the gateway allows clients to connect via a single normalized API or FIX interface and trade on more than 40 global derivatives exchanges.

## Key Capabilities

- » Trade via one single API
  - Trade on all major derivatives and Fixed Income exchanges over the same normalized interface
  - Seamlessly integrated with the Exegy's FrontPrice Market Data solution
  - A fully compatible pre-trade risk layer which is compliant with major regulations including MiFID II and SEC Rule 15c3-5
  - FIX Drop Copy of Orders and Executions for real-time audits and compliance
  - Abstract your systems away from Exchange-driven API changes
- » Execute orders fast
  - Ultra-low latency direct exchange access for quality order execution and management to support your algorithmic trading strategies or smart order router.
- » Pre-Trade Risk
  - Extensive library of risk checks allows validation of order flow before being sent to the Exchange.
- » Easy integration
  - Our execution gateways can be integrated with most trading screens and EMS systems as well as back-office applications
- » Reduce TCO
  - Save time and money when you power up your trading system by leveraging Exegy's technology solutions

## About Exegy®, Inc.

Exegy is a global leader in low-latency market data, execution technology, trading platforms, and predictive signals. Backed by Marlin Equity Partners, Exegy serves as a strategic partner to the complete ecosystem of the buy side, sell side, exchanges, and ISV/technology firms around the globe.

At the heart of Exegy solutions are fully managed, high-performance, and scalable solutions powered by purpose-built appliances, hardware-acceleration, artificial intelligence, enterprise software, and service automation technologies derived from our extensive patent portfolio.

Headquartered in St. Louis with regional offices in the US, UK, and Asia Pacific regions, Exegy has the global footprint to deliver world-class support and managed services to its customer base.
